

UVGI-800

Portable Active Air Disinfection Unit

The UVGI-800 is a compact, cost-effective, and efficacious solution for the sterilisation of air within enclosed spaces. UV-C disinfection technology inactivates microbes in the air and is safe to use while the room is occupied, as the UV light is safely contained within the unit. Air is drawn in through side inlets and is exposed to very powerful UV-C inside the chamber, before being expelled back into the room via a front outlet.

Key benefits

- ✓ Effective UV-C sterilisation
- ✓ Simple to use – no training required
- ✓ Compact – fits through all doorways
- ✓ High capacity
- ✓ Quiet operation
- ✓ Portable – mounted on castor wheels for easy moving
- ✓ Low power consumption
- ✓ Cost effective

Due to its compact size, quiet operation and high capacity, the UVGI-800 is ideal for use in the following areas:

Offices

Shared workspaces

Healthcare

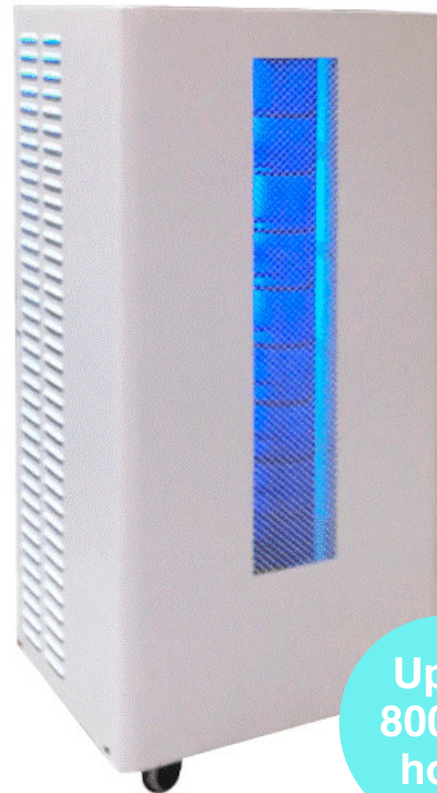

Dental practices

COVID - SECURE

Increasing your workplace safety

Up to
800m³/
hour

Technical characteristics

Dimensions (mm)	830 x 425 x 300
Weight	25kg
Maximum noise level	52dB(A)
