Henley Homes

Main contractor
Reis Construction

Location
Cheadle, Greater Manchester

Sector
Housing Sector

Contract value
Approx £700,000

Products
Modus Flush
Sash Windows in
Anthracite Grey

Modus Flush Sash windows have been chosen for installation in over 150 new build townhouses in Cheadle, Greater Manchester.

The project comes as part of contemporary restoration by Barnes Village in an effort to restore and convert original Grade II listed buildings, thus meeting modern building regulations. The designs were originally specified for Velfac products but was changed to Eurocell to assist the contractor in delivering within their desired budget.

Eurocell was selected due to its ability to offer guaranteed colour matching roofline without compromising quality. Eurocell was also able to assist in the design and planning process ensuring that the new specifications were fully compliant and approved. Modus also adhered to very tight acoustic requirements due to the location being very close to major roads and flight paths from a nearby airport.

All together better
