

# Considerate Constructors Scheme Best Practice – The Loowatt Pod

The Considerate Constructors Scheme (CCS) Best Practice Hub publishes Loowatt as complying with their high standards! We are Flush with Happiness!

The Best Practice Hub hosts examples of construction industry best practice sourced from across the UK and Ireland. It is related to the CSS's Code of Considerate Practice which focuses on five main aspects:

- Care about Appearance
- Respect the Community
- Protect the Environment
- Secure everyone's Safety
- Value their Workforce

Here is what the Considerate Constructors Scheme shared about the Loowatt Pod:

*"This mobile waterless toilet block is a great solution for sites where there is no running water or sites that are short of space. Cabins come on the back of a wagon and from delivery take an hour to set up and be ready for use. The toilets utilise a unique belt and bag system which captures waste and pinches the bags after "flushing" which combined with carbon filters eliminates the smell. The waste is then removed by the supplier [Loowatt] and sent to Thames Water, then the waste is used as feedstock for anaerobic digestion in utility systems, completing the energy cycle."*
