

We re-engineer waste paint into a premium quality paint for the trade.

Paint 

Every year in the UK it is estimated that 55 million litres of waste paint is sent to landfill or incineration

Best Practice for Waste Paint

Paint is received nationally at our dedicated waste paint recycling centre

Sorted by paint type and colour

Every can is opened, stirred and checked for quality before the re-engineering process may begin

Supplied in recycled paint pots

Waste paint is re-engineered to **compete** with leading brands on **quality** and **price**.

Up to 95% recycled content

1 litre of our paint saves enough embedded carbon to drive a transit van 5 miles carbon free

Creating job opportunities for those with **barriers to employment**

Social Enterprise lowering carbon while increasing closed loop recycling
