Artemis Interiors, specialist fit out contractor celebrate the award for the CAT A+ fit out project in EC4, a grade II listed building which houses luxury serviced offices in the heart of the City's financial district.

Having secured the project, Artemis Interiors looked to Westgate Global to **supply and install Hoardfast to create a site office, meeting room and canteen area**. Hoardfast is a temporary, quick-install, modular, sustainable internal hoarding system used by leading fit out and construction firms, to form quality internal site offices and welfare facilities and/or to contain dust and noise.

Choosing Hoardfast also ensures that Artemis Interiors benefit from responsive and personalised service, and **a cost effective, sustainable and zero waste product** on their current and future projects.

On this project Westgate installed a total of 30 linear metres of 2.25m high Hoardfast uPVC with equal foot supports and 4 single doors, with installation taking less than a day. Artemis Interiors applied their own vinyl graphics to complete the professional and branded look and feel to their site set up.
