

## SYSTEMS PRODUCT GUIDE 2023 - 2024

# **ECA Solution Generators** Introduction

#### **CENTREGO ECA SYSTEMS**

Centrego design, develop and manufacture ElectroChemical Activation (ECA) systems in the UK that generate disinfection and cleaning solutions from ordinary potable water and small amounts of salt. The systems, designed for in-situ use, have the benefits of ultra-low carbon emission footprints when compared with purchased synthetic chemicals, low operational costs, and improved health and safety for users and environments.

Solutions generated by Centrego's ECA systems include

- >Hypochlorous acid (HOCI) a powerful but safe pH-neutral biocide with very rapid contact times and high efficacy
- > Mixed oxidant solution (MOS) active substances of sodium hypochlorite (NaOCI) and hypochlorous acid a combined biocide and cleaning agent at pH8.2 – pH8.5
- > Sodium hydroxide (NaOH) a cleaning agent and surfactant at pH13 pH14

#### **DECIDING WHICH SYSTEM IS OPTIMUM FOR YOUR BUSINESS**

The first steps in choosing the optimum device for your organisation is establishing what applications are required, what solutions would deliver the efficacy and cleaning performance required, and deciding how much solution is needed on a daily, weekly, monthly basis.

Decisions should also take into account corporate initiatives to reduce carbon emission footprints and environmental impacts, Return on Investment and payback periods, and considerations of the health and safety of users, staff and the public.

Centrego and its partners are experts in assisting businesses to identify the best ECA system for the requirements, specifying the solution delivery mechanisms, providing installation, training and aftersales support, and quantifying the environmental and cost benefits of adopting the systems.

Centrego manufactures a comprehensive range ECA systems which meet the demands of multiple public and commercial sectors. In addition, we develop bespoke systems for specific applications and invest heavily in R&D to continue to expand the use of ECA technology.

#### **CERTIFICATION AND APPROVALS**

Centrego systems carry the appropriate biocides and safety regulatory listings and certifications in multiple countries. The solutions generated are tested by independent accredited laboratories to EN standards for efficacy performance on multiple microorganisms.

Flow-1000. Flow 1.200	

#### Flow-1000, Flow 1.200

- >Industrial process water
- >Cruise ships
- > Food processing
- >Cleaning-in-place (CIP)
- >Agriculture
- >Aquaculture
- >Horticulture
- >Water treatment

#### 2

### **MEDIUM SYSTEMS**

#### can Active, Active Plus ctive Plus Auto

- Aedium-sized offices
- Aedium-sized retail spaces
- Restaurants
- arge pubs and bars
- Small to medium-sized factories
- Vorkplaces
- Merchant ships
- Small food processing and
- preparation facilities
- Schools and nurseries

#### SYSTEMS

#### 0, 5K40, 5K120, 5K200

- ndustrial process water Vater treatment Cruise ships – water treatment and laundry Merchant ships – hold cleaning for 'black cargo', agricultural products and fertiliser Vastewater treatment isheries – fishing and shell-fishing trawlers Fish and shell-fish processing Aquaculture – hatcheries and growing farms Agriculture – dairy, pig, poultry Cleaning-in-place (CIP) – food processing, beverage production, yeast production
- Offshore platforms facilities

### **FHOLYTE SYSTEMS**

#### 0H-20, NaOH-155, NaOH-1000

Cleaning-in-place (CIP) – food processing, beverage production, yeast production Aquaculture – pH balancing in fish-tank water Vater treatment – pH balancing

## **SMALL SYSTEMS**

#### **TOUCAN ECO E-SPRAY**

Capacity: 350ml Active substances: mixed oxidant solution of hypochlorous acid (HOCI) and sodium hypochlorite (NaOCI) Concentration: 125-250ppm pH7.5-pH8.5 Activation cycle: 5 minutes Salt consumption: 4g/l Power rating: 10W 5V 2A via USB port Stand-alone/desk-top Dimensions: H280mm x W90mm x D90mm Suitable for domestic use for general cleaning and disinfection applications

#### **CENTREGO RENEW**

Capacity: 2ls mixed oxidant solution Active substances: hypochlorous acid (HOCl) and sodium hypochlorite (NaOCl) Concentration: 125-250ppm pH7.5-pH8.5 Activation cycle: 4 or 8 minutes Salt consumption: 4g/l Power rating: 33W Stand-alone/desk-top Dimensions: H320mm x W200mm x D230mm Suitable for small to medium-sized commercial facilities for general cleaning and disinfection applications

#### **TOUCAN ECO BIO CARRY**

Active substances: hypochlorous acid (HOCI) and sodium hypochlorite (NaOCI) Up to 10ls capacity Capacity up to 10ls Concentration: up to 250ppm Salt consumption: 1-2gm/I Power ratings: 240V mains or 12V solar-powered battery Dimensions: H350mm x W450mm x D120mm Portable Field unit for remote locations or emergency response and disaster relief generation of mixed oxidant solutions

4

5

## **MEDIUM SYSTEMS**

#### **TOUCAN ECO ACTIVE**

Capacity: 10ls mixed oxidant solution Active substances: hypochlorous acid (HOCI) and sodium hypochlorite (NaOCI) Concentration: 100-200ppm pH7.5 – pH8.5 Activation cycle: 20 minutes Salt consumption: 1-2g/l Power rating: 100W Dispensing via discharge tap Dimensions: H550mm x W550mm x D160mm Suitable for medium-sized commercial applications

#### **TOUCAN ECO ACTIVE PLUS**

Capacity: 5ls mixed oxidant solution Active substances: hypochlorous acid (HOCI) and sodium hypochlorite (NaOCI) Concentration: 350-600ppm pH7.5 – pH8.5 Activation cycle: 40 minutes Salt consumption: 2-4g/l Power rating: 100W Dispensing via spray bottle and bucket/container fillers Point-of-use solution dispensing: 17ls @120ppm, 34ls @60ppm Dimensions: H550mm x W600mm x D160mm

#### **TOUCAN ECO ACTIVE PLUS AUTO**

Capacity: 5ls mixed oxidant solution Active substances: hypochlorous acid (HOCI) and sodium hypochlorite (NaOCI) Concentration: 350-600ppm pH7.5-pH8.5 Activation cycle: up to 40 minutes Salt consumption: 2-4g/l Power rating: 600W Dispensing via spray bottle and bucket/container nozzle Point-of-use solution dispensing: 17ls @120ppm, 34ls @60ppm Dimensions: H650mm x W480mm x 250mmD

7

## **FLOW SYSTEMS**

#### CENTREGO FLOW 40 - 120, 200, 400, 600, 1000 AND 1,200

Membrane cell system Active substances: Hypochlorous acid (HOCl) from the anode and sodium hydroxide (NaOH) from the cathode Outputs options: 40ls/hr, 120ls/hr, 200ls/hr, 400ls/hr, 600ls/hr, 1000ls/hr and 1,200ls/hr Concentrations: 500ppm HOCl pH 7.2, NaOH pH10.5 Power ratings: 1.1kW-8kW Salt consumption: 2gm/l Full telemetry is available for remote monitoring, recording and control Range of ancillary equipment for solution storage, dispensing and dosing Dimensions: (Flow-40 and 120) H740mm x W550 x D330mm Dimensions for Flow 200 upwards on request, dependant on specification Suitable for large facilities, cruise ships and industrial process water

#### **CENTREGO FLOW SERIES - WITH ANCILLARY EQUIPMENT**

Membrane cell system Active substances: hypochlorous acid (HOCI) from the anode and sodium hydroxide (NaOH) from the cathode Outputs options: 40ls/hr Concentrations: 500ppm HOCl pH 7.2, NaOH pH10.5 Power ratings: 1.1kW Salt consumption: 2gm/l Full telemetry is available for remote monitoring, recording and control. Suitable for large facilities, cruise ships and industrial processes. Range of ancillary equipment for water softening, solution storage, dispensing and dosing Dimensions for Flow series dependant on specification

#### **CENTREGO FLOW 40 AND FLOW 120 PLUS**

Membrane cell system Fully integrated system with water softener, holding tanks and dispensers mounted on 316-grade stainless steel frame. Active substances: hypochlorous acid (HOCI) from the anode and sodium hydroxide (NaOH) from the cathode Outputs options: Flow-40 Plus @ 40ls/hr, Flow-120 Plus @ 120ls/hr Concentrations: 500ppm HOCI pH 6.5-7.2 Power rating: 1.1kW-1.8kW Salt consumption: 2gm/l Full telemetry is available for remote monitoring, recording and control Suitable for large facilities, cruise ships and industrial processes Range of ancillary equipment for solution storage, dispensing and dosing All-in-one integrated solution for ECA production Dimensions : H1840mm x W660 x D490mm

## **5K SYSTEMS**

#### **CENTREGO 5K20 5K40 & 5K120**

Non-membrane cell system with inputs of either water + brine, sea water, or a combination Fully integrated system with water softener, holding tanks and dispensers, mounted on a 316-grade stainless steel frame Mixed oxidant solution Active substances: hypochlorous acid (HOCI) and sodium hypochlorite Outputs: 5K20 20ls/hr, 5K40 40ls/hr and 5K120 120ls/hr Concentrations: 5000ppm mixed oxidants pH8.2-pH8.5 Power rating: 1.5kW-6kW Salt consumption: 20gm/l Full telemetry is available for remote monitoring, recording and control Dimensions : H1740mm x W860 x 530mmD Suitable for industrial process water, water treatment and CIP

#### **CENTREGO 5K200 & 5K400**

Non-membrane cell system with inputs of either water + brine, seawater, or a combination Fully integrated system with water softener, mounted on a 316-grade stainless steel frame Mixed oxidant solution Active substances: hypochlorous acid (HOCI) and sodium hypochlorite Outputs: 5K200 200ls/hr, 5K400 400ls/hr Concentrations: 5000ppm (adjustable) mixed oxidants pH8.2-pH8.5 Power rating: 8kW-16kW Salt consumption: 20gm/l Full telemetry is available for remote monitoring, recording and control Dimensions : 800mmH x W1000 x D780mm Suitable for industrial process water, water treatment and CIP Suitable for marine applications using seawater

## **CATHOLYTE SYSTEMS**

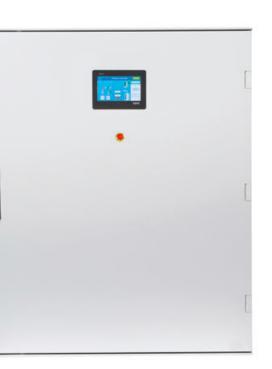

#### **CENTREGO NAOH FLOW-20 GENERATOR**

Membrane cell system with inputs of water + brine Active substance: sodium hydroxide and hypochlorous acid Outputs: Flow-20 20ls/hr NaOH, 0.1ls/hr HOCl — Concentration: 3000ppm catholyte (NaOH) at pH13.0-pH13.5 Concentration: 3000ppm HOCl at pH2.5-pH3.0 Power rating: 1.8kW Salt consumption: 4gms salt per 1g NaOH Full telemetry is available for remote monitoring, recording and control Dimensions : H740mm x W550 x D330mm Suitable for industrial process wash-water, water pH balancing and CIP

#### **CENTREGO NAOH FLOW-20 PLUS GENERATOR**

Fully integrated system with water softener, holding tanks and dispensers mounted on a 316-grade stainless steel frame. Membrane cell system with inputs of water + brine Active substance: sodium hydroxide and hypochlorous acid Outputs: Flow-20 20ls/hr NaOH, 1ls/hr HOCI Concentration: 3000ppm catholyte (NaOH) at pH13.0-pH13.5 Concentration: 3000ppm HOCI at pH2.5-pH3.0 Power rating: 11.8kW Salt consumption: 4g salt per 1g NaOH Full telemetry is available for remote monitoring, recording and control Dimensions : H1840mm x W660 x D490mm Suitable for industrial process wash-water, water pH balancing and CIP

## **CATHOLYTE SYSTEMS**

#### **CENTREGO NAOH FLOW-155 GENERATOR**

Membrane cell system with inputs of water + brine Active substance: sodium hydroxide and hypochlorous acid Outputs: Flow-155 155ls/hr NaOH, 1ls/hr HOCl Concentrations: 3000ppm catholyte (NaOH) at pH13.0-pH13.5 Concentration: 3000ppm HOCl at pH2.5-pH3.0 Power rating: 7kW Salt consumption: 4g salt per 1g NaOH Full telemetry is available for remote monitoring, recording and control Suitable for industrial process wash-water, water pH balancing and CIP Dimensions : H2000mm x W665 x D400mm

#### **CENTREGO NAOH FLOW-1000 GENERATOR**

Membrane cell system with inputs of water + brine Active substance: sodium hydroxide and hypochlorous acid Outputs: 1000ls/hr NaOH, 5ls/hr HOCl Concentrations: 3000ppm catholyte (NaOH) at pH13.0-pH13.5 Concentration: 3000ppm HOCl at pH2.5-pH3.0 Power rating: 380 VAC/3-Phase. Total power usage: 12V, 3600A. 43kW Salt consumption: 4g salt per 1g NaOH Full telemetry is available for remote monitoring, recording and control Dimensions : H2000mm x W2250mm x D400mm Suitable for industrial process wash-water, water pH balancing and CIP

NaOH flow 1000 generators are available in modular form adding 155 or 310 ls/hr capacity for each additional module.

Dimensions and overall design may vary dependant on applications.
